ECO-COACH & TOURS (M) SDN. BHD

18-28-A1, Gurney Tower, Persiaran Gurney, 10250 Penang Telephone: +6(04)-227-8668 H/P Whatsapp: +6019-590-1478 Email: ecotourism@eco-tours.com.my Join our guide on this most memorable outing of the best Langkawi has to offer and take home lasting impressions of this magical place. This excursion is the most highly recommended trip in Langkawi.

Sheer limestone cliffs, fiords, and sea stacks majestically rise like ancient temples out of the ocean. The porous nature of limestone that is continually exposed to the dehydrating sun, wind, and salt from the oceans has resulted in the growth of a unique flora some of which cannot be found anywhere else in the world. Rain and tidal movements will weather and shape these stunning karst formations giving rise to numerous caves, crevasses, and canyons. Mangrove forests play an essential part in maintaining the ecological balance of the world. They influence the climate, provide shelter and act as major nurseries for fish and shrimps. Our journey takes us on a voyage of exploration to discover exotic plants and animal species; many of them surviving by gifted methods in a dynamic environment of constant change dictated by the rise and fall of the tides. Let our experienced guide take you back into time for a tour surely not to be missed.
